Fall 1952

Spring 1953

TERMS AND INFORMATION

THE SHERWOOD NURSERY COMPANY located in Portland, Oregon, are leading propagators and growers of conifers and broad leaved evergreens.

SHIPPING SEASON: Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about April 1.

TERMS:

Our terms are NET CASH. Note carefully the following conditions:

1. We PAY SHIPPING COSTS on lining out stock to all points in the United States, Canada and Alaska. Lining out stock for this purpose is defined as any stock not listed as B&B, specimen, or BR.
2. At least ONE-FOURTH of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full in advance required on all B&B and BR shipments.
3. The prices quoted are NET CASH PRICES. Prices on our B&B stock are F.O.B. our Portland Nursery, at Southeast 73rd Avenue and East Burnside Street.
POSITIVELY NO ORDER for lining out stock will be accepted for less than 25 plants of the same size and variety.
Prices quoted in the 10, 100, or 1000 lots apply to ONE SIZE and ONE VARIETY only.
We reserve the right to substitute grades when necessary and the difference is not too great.
Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate.
B&B signifies balled and burlapped. BR signifies bare roots.
4. The prices quoted herein will hold only throughout the coming nursery year.

IMPORTANT —

5. Orders will be filled as soon as possible after being received. No reservations of B&B stock will be made. Lining out and BR stock may be reserved only upon special arrangement in which case an additional charge of at least 10% will be made to cover cost of handling and holding.

PACKING:

No packing charge is made on any stock.

Many small balled grades can be shipped safely, packed BR (Bare Roots) in moss thereby cutting down shipping costs. Where this can be done we have so indicated. Our method of packing insures the arrival of plants in perfect condition at any place in the United States, Canada and Alaska.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner. WE MAKE NO GUARANTEE, either expressed or implied, that the plants will grow or give specific results. ALL SHIPMENTS ARE MADE AT THE RISK OF THE PURCHASER AFTER BEING DELIVERED TO THE CARRIER IN GOOD CONDITION. We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

**SHERWOOD NURSERY COMPANY
141 S. E. 65th Ave., Portland 16, Oregon**

TO REACH PROPAGATING NURSERY AND SALES OFFICE:

Drive east on East Burnside Street to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city.

General Nurseries are located on the Section Line Road.

Sherwood Nursery Company pays all shipping costs on lining out stock to all points in the United States, Canada and Alaska. We pay all packing costs. Our terms are net cash. At least one-fourth of the purchase price must accompany all orders, balance C.O.D. Payment in full in advance required on all B&B and BR shipments.

— G E N E R A L L I S T —

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

Abelia (Edward Goucher)

A choice upright abelia similar to grandiflora but with foliage of richer coloring especially in the fall when it takes on a lovely bronze cast. The abundant flowers, which cover this hardy evergreen all summer and fall, are deep pink shading to a soft lavender and mingle in perfection with the full fine foliage. Height 5 to 6 feet.

ABIES (FIRS)

Abies concolor (White Fir)

A tree of symmetrical growth and beautiful bluish foliage. It has great resistance to heat, cold and drought, and these qualities combined with its beautiful landscape effect make it a truly desirable tree in many locations.

1- 3 inches once transplanted.....	8	64
3- 6 " " "	10	80

Abies grandis (Grand Fir)

A dark green symmetrical conifer with wide downward sweeping branches. Needles flat, rather long.

3- 6 inches once transplanted.....	10
6- 9 " " "	13
9-12 " " "	16

Abies nobilis (Noble Fir)

The name noble describes this magnificent tree perfectly. A native of the Coast and Cascade mountains of western Washington and Oregon where its dignified appearance is set out in striking effect. The branches grow in whorls with great regularity along the main stem of the tree and are broadly spreading toward the tips. The foliage is usually a beautiful bluish green in color. It is valuable for landscaping purposes and the best of all for the production of Christmas trees. Very hardy.

Arborvitae—See Thuja

Arctostaphylos sherwoodi (Sherwood's Cascade Kinnikinnick)

A natural hybrid between *Arctostaphylos columbiana* and *Arctostaphylos nevadensis*, product of the Cascade Mountains. The original plant is 2½ feet tall and more than 20 feet across. The foliage which is very dense has an attractive tint of gray. Leaves are rather narrow and pointed. Berries red. The vinelike stems are strong and the plant is hardy. A natural rapid growing bank cover of superior merit. It makes an impenetrable mass of lovely soft foliage which practically prohibits all weed growth. Our own introduction.

AUCUBAS**Aucuba japonica** (Greenleaf Aucuba) (Female)

Splendid, heavy, deep green foliage and a profusion of very large, bright red berries. Robust, shade loving evergreen to 6 feet.

3- 6 inches once transplanted.....		11
6- 9 " " "		14
9-12 " " "		17

Aucuba japonica (Greenleaf Aucuba) (Pollenizers)

Male plants. Aucubas never bear berries unless pollenizers are planted with them. The large red berries are one of the attractive features of Aucubas and it is therefore essential to plant the pollenizers. The foliage is fine solid deep green. Shade loving evergreen. These will pollenize any variety.

3- 6 inches once transplanted.....		11
6- 9 " " "		14
9-12 " " "		17

Aucuba japonica nana (Dwarf Aucuba) (Female)

This is a dwarf form with lustrous green leaves and a profusion of bright scarlet berries borne in clusters making a combination of surpassing beauty. Appeals to everyone. Hardy at Ogden, Utah. Comparatively new and rare, but certain to find a place in many gardens. Like the other Aucubas, it is dioecious and the male plants must be planted with the females to produce fruit. Shade loving evergreen.

3- 6 inches once transplanted.....		11
6- 9 " " "		14

Aucuba japonica variegata (Golddust Aucuba) (Female)

Leaves large, glossy, dark green splashed with gold. Hardy and resistant to smoke and dust. The variegated foliage gives this plant a bright cheerful aspect and since it thrives best in deep shade it is a most useful evergreen for brightening dark, shady corners difficult to landscape. Grows 5 to 6 feet tall.

Azalea mollis (Chinese Azalea)

Very hardy. Blooms before leafing. Foliage bright green and attractive, turning to gorgeous shades of bronze and red in the fall. Flowers are large and borne in great profusion. It has an irresistible appeal and is a great favorite to all who know it. Its plantings cannot be overdone. We are offering choice plants chiefly in the popular shades of salmon and orange.

SHERWOOD AZALEAS

(Originated and introduced by Sherwood Nursery Co.)

Sherwood Orchid Azalea

This is a hybrid hinodegiri and our own introduction. We have been growing it for several years in our nursery where it has attracted much attention. Foliage about the size and gloss of the Hinodegiri Crimson Azalea but the plant is hardier. Flowers are a clear lavender with speckled throat, completely cover the plant and are large for a dwarf size azalea. This evergreen fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden. Mass plantings in gardens or on slopes and terraces are unexcelled.

Sherwood Red Azalea

A magnificent azalea. Compact, dwarf and evergreen. Foliage so glossy it shines, bright green turning in cold weather to fiery red. Better foliage than Azalea hinodegiri from which it was hybridized. Flowers in such abundance that the foliage is almost entirely hidden and of the most brilliant blood red imaginable, brighter by far than Azalea hinodegiri. For several years those who knew we owned this azalea have begged for it but this is only the third year we have put it on the market. Hardy where Azalea hinodegiri is hardy. Words utterly fail to describe Sherwood Red Azalea. We consider Sherwood Red Azalea the finest azalea ever offered the nursery trade. It has everything: hardiness, clean habit of growth, easy culture, splendid foliage and almost unbelievable showiness of inflorescence.

Note: An unprecedeted demand for this great Azalea has forced us to remove it from the market for a season. We have none to offer this year.

Bearberry—See *Arctostaphylos*

Beargrass—See *Xerophyllum*

Boxwood—See *Buxus, Pachistima*

Broom—See *Spartium, Genista*

***Buxus sempervirens suff. albo-marginata* (Silveredge Dwarf Box)**

Has all the characteristics of the true dwarf box, hardy, dwarf, compact, symmetrical. Presents a pleasing silvery appearance due to the variegated foliage.

3- 6 " " "	12	96

CALLUNA (HEATHERS)

See also *Erica, Daboecia, Phyllodoce*

***Calluna vulgaris aurea* (Golden Heather)**

Possesses fine golden foliage that heads up in many of the stems in moss like clusters. During the fall and winter the foliage takes on beautiful tinges of red which are intermingled with green and gold. The multitude of flowers are in soft pleasing lavender shades. These blend with the green and gold of the foliage in producing one of nature's daintiest and most charming color effects. Appeals to all who see it. Hardy, new. Height about 18 inches.

6- 9 inches twice transplanted.....	16	128
9-12 " " "	20	160

***Calluna vulgaris nana* (Moss Heather)**

A dainty little dwarf, of moss like appearance growing about 4 inches tall. It is of exceeding close, compact growth with refreshing green foliage and delicate lavender blossoms in mid summer. On account of its mossy luster it fits perfectly into rockeries, stream and pool borders, close-proximity to fountains, garden steps and walks and into most situations where neatness and delicacy are sought. One of the loveliest evergreens it is our privilege to grow. Rare and very hardy.

***Calluna vulgaris rubra* (Red Heather)**

The Red Heather has become one of the popular garden evergreens. When in bloom there is nothing visible but the blossoms, which are a rich, purplish-red. It is a brilliant display of flowering beauty in mid-summer. Hardy, and grows about 2 feet tall. Its blooms are especially welcome coming at a season when there is but little competition in blossoming shrubs.

	Each	10	100	1000

***Camellia japonica* (Cheerful)**

Camellia in commemoration of George J. Karmel or Cammellus, a Jesuit who traveled in Asia in the 17th century. The camellia holds a place right up in the front ranks among flowering trees. The superb, waxy, rose like flowers are loved by everyone, are fine when on the tree or as cut flowers. Leaves are large, of intense, waxy glossy surface and make just the right setting for the wax-like flowers which are splendid, double, perfectly shaped and bright red. A favorite.

30-36 " " "	B&B	3.50	31.50

***Castanopsis sempervirens* (Bush Chinquapin)**

One of Oregon's wonderful native evergreens seldom offered to the trade. Unlike the tall growing form, Bush Chinquapin usually grows only 5 to 6 feet high in a spreading, much branched shrub. A plant 4 feet high will usually spread 4 to 6 feet. A stout medium sized evergreen of surpassing merit. It grows in its native state at 2000 to 4000 feet elevation but is at home at sea level. In our mountains it sometimes covers dry open slopes where only the hardiest plants can survive the summer's heat and winter's cold. Is also found in open woods with partial shade. Foliage very dense. Leaves dark green above, russet beneath. Flowers in white clusters followed by chestnut like fruits. Bush Chinquapin is a fine foundation shrub, also good for hedges and borders. It is unexcelled for large banks and terraces. A fine addition to the trade.

30-36 " " "	B&B	1.85	16.70	150

Cedar—See *Cedrus, Libocedrus, Juniperus****Cedrus atlantica glauca* (Blue Atlas Cedar)**

A tree of stately, royal appearance. Strong upright grower, formal in habit but not too much so. The branches are arranged in orderly manner. The needles are a soft, velvety blue of thrilling color effect. The Blue Atlas Cedar is a favorite in landscaping parks, cemeteries, memorials, capital and college grounds and all kinds of public situations, and for specimen planting of home grounds it has few if any superiors. It is a long-lived tree requiring minimum care.

6- 9 inches not transplanted.....	15	120
9-12 " " "	20	160
12-15 " " "	25	200

Having been grown from seed these trees cannot be expected to have the intense blue of the grafted form.

Cedrus deodara (Deodar Cedar)

The Deodar Cedar grows into a fountain of green of surpassing beauty. The color is a light bluish green. With a little pruning and shearing the foliage becomes very dense and graceful. It is a native of the Himalaya mountains in India where it has been fittingly termed "Tree of the Gods."

CHAMAECYPARIS**Chamaecyparis lawsoniana** (Lawson Cypress)

A conifer of most satisfying effect, both in stately habit of growth, dense limbs and graceful foliage. Not hardy in areas of extreme cold, but fortunate, indeed, are localities which can grow this handsome tree. It is fine when grown in somewhat open or well spaced rows, and is equally good when grown as single specimens, needing no supporting plantings to enhance its beauty. Native of the Oregon coast.

Chamaecyparis lawsoniana cerula

One of the fine Lawson variations, of which there are several. Slender and upright, the branches all growing vertical and very close to the trunk of the tree. As slender as a Pyramidal Arborvitae or Irish Juniper and needs little pruning. As indicated by the name, the foliage is deep sky blue or azure in color. Has the columnar form of the allumi cypress and very desirable where slender trees are needed.

Chamaecyparis lawsoniana ellwoodi (Ellwood Cypress)

A semi dwarf and comparatively new addition to the cypress family which has added such a long list to the trees that we admire and love. Ellwood Cypress is a trim, compact, narrow pyramid with soft, feathery, bluish green foliage. It is superior to many of the older forms of cypress with which we are familiar and certainly will replace some of them. Naturally grows in its lovely form with scarcely any pruning. Hardy.

***Chamaecyparis lawsoniana fletcheri* (Fletcher Cypress)**

A narrow pyramid in form, very neat and tidy. Compact in growth with full soft appearing foliage of blue-green color effect. On account of its erect, close habit of growth it is especially well adapted to small homes and grounds where space must be conserved. It is a tree that is pleasing in every detail.

24-30 inches twice transplanted.....	B&B	1.65	14.90	134
30-36 " " "	B&B	1.85	16.70	150

***Chamaecyparis lawsoniana lutea* (Golden Lawson Cypress)**

Dense golden cypress. The foliage is very heavy, while the tree itself is a broad symmetrical pyramid, branching close to the ground. A trim, handsome ornamental, giving the impression of an individual well dressed and groomed, and with the minimum amount of attention. Golden color throughout the year. Resembles Westermann Cypress. Height 12 to 15 feet or more.

3- 6 inches once transplanted.....				13	104
------------------------------------	--	--	--	----	-----

***Chamaecyparis lawsoniana stewarti* (Wintergolden Cypress)**

Rather slender golden tree. Foliage erect with pendulous tips toward the top of the tree. One of the most remarkable and most admired of conifers, always attracting attention. Stately in habit, with green and gold foliage of most effective contrast. Hardy.

3- 6 inches once transplanted.....				13	104
------------------------------------	--	--	--	----	-----

***Chamaecyparis nootkatensis glauca compacta* (Compact Blue Alaska Cypress)**

A distinctive form of the Alaska Cypress. Has compact, dense foliage of charming blue-green color. Semi-dwarf, neat and conical in form needing little or no pruning. Hardy and rare. A tree that is certain to be used extensively as it becomes known and appreciated. It belongs to that somewhat restricted group of trees that retain their shapely beauty without considerable care and pruning.

12-15 inches twice transplanted.....	B&B	1.20	10.80	97
15-18 " " "	B&B	1.50	13.50	122

***Chamaecyparis pisifera filifera* (Thread Cypress)**

A graceful and attractive tree crowned and covered with slender pendulous branches and strands of thick dark green foliage. Rather a dwarf tree of much ornamental value. Trees may be planted singly. Thread Cypress also makes a hedge of unusual merit.

15-18 inches twice transplanted.....	B&B	1.45	13.10
--------------------------------------	-----	------	-------	-------

Chamaecyparis pisifera filifera nana aurea (Dwarf Golden Thread Cypress)**(Heavy Type)**

Dwarf evergreen growing into a compact mass of velvety, dark golden, pendulous filaments. A remarkable irregular cone shaped conifer that adds a touch of cheer and brightness wherever used. Withstands full sun without burning. A rare type of the true dwarfs. Hardy.

Cotoneaster parneyi (Parney Cotoneaster)

This is probably the best of the upright cotoneasters. It is evergreen, with large leaves of heavy, dark green effect. Grows to about the size of francheti, 6 to 8 feet, bears berries of brilliant red luster and in almost unbelievable profusion, being in large clusters all along the stems. A shrub which everybody likes, and one which will be used more extensively.

ERICA (HEATHS)

See also *Calluna*, *Daboecia*, *Phyllodoce*

Erica carnea sherwoodi (Sherwood Creeping Heath)

Low growing heath with brilliantly green foliage. Blooms very profusely in late winter and spring. Flowers bright carmine red. Perfectly hardy. Splendid new evergreen. Height 6 inches. Has the habit of rooting along the stems thereby spreading almost indefinitely in a very satisfactory manner. An extraordinarily beautiful gem in rockeries, around pool margins and in borders. A superb ground cover. Pleasingly fresh in appearance the year round. Probably the best of dwarf heathers.

6- 9 " " "				14	112

Erica mediterranea hybrida (Darley Heath)

This is one of the most attractive and desirable plants in its class grown in our nursery. It is hardy and dwarf, seldom reaching more than 1 foot in height. It has beautiful, dense, dark green foliage, and from early winter to late spring is covered with such a profusion of lovely purplish blossoms that the foliage is practically obscured. It is not unusual to see this brave little plant blossoming through the snow. Being a winter bloomer, hardy, equally good for rockeries, borders, groups and masses, it should be included in every planting.

EUONYMUS**Euonymus radicans (Wintercreeper)**

Low procumbent shrub. May be trailing and rooting, or climbing branches, sometimes reaching a height of several feet. The rich green foliage is carried all winter. It is at its best when planted against a wall or building where it will climb for several feet and grow in decorative beauty year by year. It belongs to a class of very worthy shrubs. Hardy evergreen. Beautiful in rockeries or when hanging over walls. A very superior ground cover.

3- 6 inches once transplanted.....	10
------------------------------------	-------	-------	----	-------

Euonymus radicans argenteo marginatus (Silveredge Wintercreeper)

A variegated, low, procumbent shrub with often trailing and rooting or climbing branches. Very dense foliage, which presents a light appearance in summer, and a cheerful and particularly pleasing one, when in the winter season the variegation of the dainty leaves takes on charming tints of red and pink when flowers are scarce in the garden and a touch of color is welcome. Dwarf and hardy. Height about 18 inches but will mass up against a wall to a height of 6 feet or more in old specimens.

Euonymus radicans vegetus (Bigleaf Wintercreeper)

A larger type of radicans. The leaves which possess the same dark, rich green color, are of profuse growth and larger than those of radicans. The plant grows to a height of about 3 feet and attains a spread of 5 feet or more. Very hardy.

3- 6 inches once transplanted.....	10
------------------------------------	-------	-------	----	-------

Euonymus radicans vegetus argenteo-marginatus (Variegated Bigleaf Wintercreeper)

Much the same as the Silveredge Wintercreeper but larger and more spreading and with larger leaves which take on charming tints of red and pink that are a delight in the winter season. Foliage dense. Height about 2½ feet, spread 4 feet or more. Shade loving evergreen.

3- 6 inches once transplanted.....	10
------------------------------------	-------	-------	----	-------

Fir—See *Abies, Cunninghamia, Pseudotsuga*

Gaultheria procumbens (Wintergreen)

This is the little plant which produces the true wintergreen flavor and from which wintergreen oil is extracted. There is nothing with which it can be compared for the reason that it is in a class by itself. It is a sturdy, hardy little subject flourishing northward into Canada and well to the southward particularly in elevated regions. The tiny leaves are nicely rounded, deep green and glossy and take on rich shadings of deep red in the autumn. Grows to a height of only 4 to 6 inches but produces a matted ground covering. Bears bright red berries in great abundance. These berries, which are edible, remain on the plants until the following summer. Children often take delight in gathering them as well as the tender young leaves for their sweet wintergreen flavor. When food is scarce in the winter season they form a part of the food of game birds. The fine foliage, the small, delicate, pink, bell-shaped flowers, the brilliant red berries and its hardiness combine to make it one without peer in its class. To know this delightful little plant is to admire and love it and it should occupy a place in every garden where it will grow. Along with its other merits it is easy to handle.

Pieris japonica (Oriental Pieris)

A shrub of oriental origin, growing to a height of 4 or 5 feet. Has glossy deep green foliage. In early spring it is crowned in a magnificent way with large clusters and masses of white drooping bell-shaped flowers which sometimes appear before the last late flurries of snow have gone. The young foliage is tinged with pink. One of the very best evergreen ornamentals for landscaping purposes. Hardy.

Pseudotsuga douglasii (Douglas Fir)

One of the conifers of great commercial value of the Pacific coast. Native British Columbia to Mexico and eastward to Montana and Colorado. Reaches a height of 200 feet or more, being among the tallest trees in the world, and a diameter of 12 feet. Good dark green foliage. We are offering the Colorado silver-gray strain, considered the best for ornamental purposes. A truly stately tree, and while it reaches great size and height it also possesses great ornamental values when introduced into landscaping plans. In its native haunts the younger trees and groups of trees have a most impelling appeal both in form and coloring.

Redcedar—See Juniperus**RHODODENDRONS****Rhododendron maximum** (Rosebay Rhododendron)

Large, rapid growing shrub. Leaves often 12 inches long, dark green, lustrous above. Flowers usually rose colored in large clusters. A bold, magnificent evergreen. Fine for naturalistic and woodland plantings. Rhododendrons are always described in superlatives. Among its many fine features is that it is hardy as far north as Quebec. Flowers in June and July. Native from Ontario to Georgia.

TAXUS (YEWS)

Taxus baccata (English Yew)

This is the old favorite of English gardens. Native of Europe and North Africa to the Himalayas. Deep green, rapid growing in good soil, very dense. Will do quite well in poor soil and in dry situations. One of the best of all hedge plants, as it will stand any amount of pruning. Thrives in either sun or shade. The English Yew has this great advantage in hedges, in common with all the yews: the trees make uniform growth all along the line regardless of sun or shade. Hardy evergreen.

		Each	10	100	1000
3- 6 inches twice transplanted.....		\$	\$	\$ 13	\$ 104
6- 9 " " "		17	136

Taxus baccata erecta (Broom Yew)

A columnar form of the English Yew of fine erect form of growth. Compact and full but not quite as narrow as the Irish Yew and having smaller needles. The foliage is dark, rich green and together with the shapely form, sets this tree out in deservedly delightful manner. Very superior for narrow hedges where real quality is desired.

Taxus baccata repandens (Spreading English Yew)

Similar to the Prostrate English Yew but with deeper colored foliage and a flatter, more spreading habit of growth. A plant 6 feet across would be only about 2 feet tall. A rare and desirable dwarf evergreen.

1- 3 inches once transplanted.....		14	112
------------------------------------	--	-------	-------	----	-----

Taxus cuspidata (Japanese Yew)

This beautiful yew is a native of the Orient and is hardy, strong and dwarf. It is a spreading tree and in older specimens may reach a spread of 20 feet and height of 8 feet. Cuspidata is fine for hedges and can be held to a superb dwarf hedge only 12 to 15 inches tall as it can stand any amount of pruning. It is equally good for medium hedges and is perfectly adapted to small homes. Has deep green foliage. Its long and continued use speaks much for the quality and desirability of the Japanese Yew. One of the most satisfactory of all dwarf evergreens for specimen and foundation use.

THUJA (ARBORVITAE)

Thuja occidentalis (American Arborvitae)

Native New Brunswick and Manitoba to North Carolina and Illinois. An old, standard favorite. Grows in compact form, narrow pyramid in shape and attaining a height of 60 feet. Withstands low degrees of temperature, makes fine low hedges or taller wind breaks. A tree that has always been justly esteemed.

3- 6 inches once transplanted.....		12	96
6- 9 " " "		14	112
9-12 " " "		17	136

***Thuja occidentalis nana* (Little Globe Arborvitae)**

A dwarf of regular form. Foliage upright and grows in thick, heavy layers appearing to be packed together, and of good bright green color. Low growing, a mature tree reaching a height of 2 feet and spread of 3 feet, and presenting an aged appearance. Desirable wherever dwarfs are needed.

		Each	10	100	1000

15-18 " " "	B&B	1.50	13.50	122	-----

***Thuja occidentalis pyramidalis* (American Pyramidal Arborvitae)**

A most desirable arborvitae of narrow columnar growth, dense and compact without pruning. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges requiring but little space are desired Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from 4 to 20 feet in height as desired and occupies only 2 feet in width. For hedges trees should be planted 18 inches apart. A Pyramidal Arborvitae hedge requires scarcely any care.

***Thuja orientalis aurea nana* (Berckmans Golden Arborvitae)**

Doubtless the most popular dwarf, golden arborvitae known. Almost globe shaped, very compact, foliage vertical and bright gold. Very formal in appearance. Being a universal favorite and hardy, there are few plantings in which it cannot be used to advantage. It always adds tone and color. Height 4 to 5 feet.

1- 3 inches once transplanted				13	104
-------------------------------	--	--	--	----	-----

***Tsuga canadensis* (Canada Hemlock)**

Native New Brunswick, to Wisconsin and south to Alabama. A well known conifer of graceful, pleasing habit of growth, and regarded by some landscape architects as one of the best of conifers. Perfectly hardy, withstanding low temperature without injury to tree or foliage. Foliage is heavy and attractive, needles are short. Is naturally broadly pyramidal in form but can be grown to a rounded head, and lends itself well to pruning into hedges.

***Tsuga mertensiana* (Mountain Hemlock)**

This magnificent conifer is native of the Cascade mountains of western United States and Canada. In its natural habitat it is seldom found below an elevation of 3000 feet except in the more northern areas and braves the cold to timber line. In the loftier situations it becomes very slender and alpine in habit of growth and often verges into a pleasing blue. While native to the colder, more rugged areas, it thrives at the lower levels. Lovely either in groups or as specimen trees. The hemlocks as a whole are a most beautiful group of evergreens but the Mountain Hemlock may be said to be the hand-

somest of them all and is usually considered to be the West's most beautiful alpine conifer.

Umbellularia californica (Oregon Myrtle)

A handsome hardy evergreen tree, 25 to 30 feet in height and sometimes reaching 75 feet. Native of southern Oregon and northern California where it reaches its greatest perfection of growth along the streams and valleys of the coast range. The tree is conical in form and the leaves are highly aromatic. Well adapted to hedges. Sargent has described the Myrtle as "one of the stateliest and most beautiful inhabitants of North American forests, and no evergreen tree of temperate regions surpasses it in the beauty of its dark dense crown of lustrous foliage"

VACCINIUM

Vaccinium ovatum (Evergreen Huckleberry)

First discovered by the Lewis and Clark expedition at the mouth of the Columbia river in 1805. One of the great beauties of the plant is the thick, waxy leaves, of blended shades of green in spring and summer, and changing to a mixture of deep crimson and bronze in fall and winter. Its winter and spring colors utterly defy description. It is a rounded plant, many branched and of unusual density. Strong, vigorous grower, and stands unlimited shearing. Can be sheared into a hedge from 1 to 5 feet tall. Does well in either sun or shade, but is at its best in partly shaded exposures. A hardy evergreen shrub of surpassing merit and a fine hedge plant. Berries small but abundant and of fine flavor.

1- 3 inches once transplanted.....	11	88
3- 6 " " "	15	120

Vaccinium parvifolium (Red Huckleberry)

A lovely deciduous shrub native of western Oregon. Foliage dainty, bright green, turning to dazzling shades of red and bronze in autumn. Does well in either sun or shade. Bark is red and in the spring the new buds give the plant a red sheen. Flowers pink and attractive, followed in summer by a great profusion of bright red berries. These though acid are edible and used for jelly making. Its habit of growth, fine foliage, bright red buds and twigs, dainty flowers and showy red berries combine to make this shrub a splendid landscape subject. Very rare in the nursery trade. Hardy.

Veronica cupressoides nana

A very dense dwarf growing into a shapely 3 foot globe without pruning. Also desirable for its bright green plumelike foliage which taken with its compact symmetrical habit of growth makes it an excellent evergreen for low borders and hedges or as a specimen evergreen. Hardy. The veronicas are mostly native of New Zealand from whence are derived scores of ornamental subjects including both deciduous and evergreen types ranging in height from a few inches to tree forms. Some of the handsomest of flowering evergreens are to be found among veronicas.

Wintercreeper—See Euonymus**Wintergreen—See Gaultheria****Xerophyllum tenax (Pine Lily, Bear Grass, Squaw Grass, or Indian Basket Grass)**

A native of the Cascade and Rocky mountains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about 18 inches high and 2 to 3 feet across. Out of the center of this grassy bunch grow the tall stems 3 to 5 feet in height and from 1 to as many as 20 in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
